

HTMI

v2.0

**MULTI-PURPOSE MINI
THERMAL MONOCULAR**

MULTIPLE MOUNTING OPTIONS

The HTMI v2.0 Mini Thermal Monocular system is so versatile, it can be configured for helmet, head, DVR, camera & rifle mounting. Its rail mount system has two rail interfaces, so it can be easily swapped from a head mount to a rifle mount in seconds without having to disengage either interface.

The unit is also small enough to be used very comfortably as a handheld imaging device without having to remove the rail mounts as well, making it a truly robust thermal spotting scope for any operation.

LESS IS MORE

v2.0

HTMI

Weight: 8.5 oz
Size: 3.94" x 2.48" x 1.57"
Digital Zoom: up to 8x
Pixel Array: 336 x 284, 640 x 512

Weight: 16 oz
Size: 5.2" x 2.8" x 2.2"
